05:45:17 Maryalice Birk: Congratulations all!
05:46:31 Cindy Navarro: Inside the lid

05:46:45 George Kabacinski: inside around the rim makes sense.

05:46:45 John Singleton: 12480 24th ave. Marne mi 49435

05:46:48 Rick Bucker: Do you have any rules of thumb for handle lengths for various types of tools?

To answer this question: Think about toolrest overhang to choose handle lengths. A negative rake scraper should have at least 3:1 handle length to overhang. 5:1 is better. I use a 7" for small tools like the Finial Gouge, and 12" for scrapers and bowl gouges. For larger scrapers and bowl gouges, 16" or longer.

05:46:51 Tom Werzyn: sign it on he tenon ...

05:47:15 howard patterson: Just inside the lid 1/4 " in

05:47:36 Tom Werzyn: using fine black marker ...
