Tool List for the Banksia Pod Mini Hollow Vessel with Finial woodturning project

These are the tools that I used to make the piece in the Demonstration:

1/16" Parting Tool
3/8" Beading and Parting Tool
3/8" 40/40 Bowl Gouge
1/2" 40/40 Bowl Gouge
1/8" Parting Tool
3/8" Finial Gouge
1/2" 50/50 Negative Rake Scraper
1/4" Vortex Tool
Figure 8 Caliper (for wall thickness)*
Short reach Caliper (for wall thickness)*
Vernier Caliper (for transferring diameter)
Miniature Live Center with Cup and Cone Points
Drill chuck and Forstner Bit for depth drilling
Depth Gauge*

Please note: It is not necessary to have all of these tools to make this project! These are what I used, but it is possible to make this project without owning all of these tools.

Most of these tools (and more) are available on my website, cindydrozda.com. The rest of them can be found at other woodturning tool suppliers.

*I didn't need these measuring devices to turn the vessel out of a Banksia Pod, but would have used them if the vessel was other material without the holes.
