Tool List for the Multi-Axis Hollow Vessel woodturning project

These are the tools that I use to make the Multi-Axis Hollow Vessel in the Demonstration:

3/4" Spindle Roughing Gouge
1/16" Parting Tool
3/8" Beading and Parting Tool
1/2" 40/40 Bowl Gouge
1/8" Parting Tool
1/2" Square Recess Finisher
3/8" Finial Gouge
1/4" Pyramid Tool
Figure 8 Caliper (for wall thickness)
Depth Gauge
Compass and Awl for layout
Steb Centers for headstock and tailstock
Forstner Bit for depth drilling
Hollowing system
Reversing fixture for doing the bottom
Drum Sander for shaping windows

Please note: It is not necessary to have all of these tools to make this project! These are what I used, but it is possible to make this piece without owning all of these tools.

Most of these tools (and more) are available on my website, cindydrozda.com. The rest of them can be found at other woodturning tool suppliers.
