Here is the clock I used for my indexing ring: https://commons.wikimedia.org/wiki/File:Clock_12-00.svg I captured it with
the Snipping Tool which is part of windows 10 and pasted it into power
point. In power point I sized it to the size of my box and drew in
the 60 degree lines for the points.

I have to but first your seminars are wonderful. You have such a lovely way of encouraging everyone’s efforts. You are so positive and cheerful. I have been turning since the early 80’s. I knew so many of the early turners to whom you have referred, like Rudy, Ray Key, Batty Sr. (who taught me so much about spindle turning and columns) I have been an architectural turner as a way of making a living.

13:08:06 From Michael Hofstetter to Cindy Drozda(Direct Message):
Looking forward for more seminars.
