04:06:00 Marylou Nye: not seeing Cindy

04:08:01 Holly Little: So... If you go a little too far into the tenon on one of the "sides," should you try to match it on the other two "sides."

04:08:56 Edgar sims: Cindy, didn't you use a straight edge along the twisted area ?

04:11:59 Holly Little: I can show my epic fail, if you want.

04:15:03 Maryalice Birk: Holly, there is always something to learn!

04:18:43 Chukk Browder: I don't remember where but I've seen a table saw jig for cutting the staves so that they look twisted when they're glued up.

04:20:07 Chukk Browder: actually might have been in Malcom Tibbett's book

04:21:24 Dale Quakenbush: looks fatter in the middle?

04:23:33 Vernon Danielsen: I'm going to try a 12 in pepper mill

04:24:55 Vernon Danielsen: Barbara Dill recommends making notes so you can reporduce neat pieces

04:25:20 Cynthia Gibson: Why does the pommel cut come out so bumpy? How do keep all sides the same distance from center? Why is there a flat between 2 sides, and what to do about it?

04:27:11 evajowu: Would you please go through the layout again. Really confused about the twist.

04:30:25 Dale Quakenbush: have a fail on a different type piece
