01:16:52 Dwayne: Wild Cherry burls all over NC
01:18:10 Andrew Henderson: What should we do if we want to make this from non burl but a wood like mesquite so we can get the bark on the edge and the sap wood and heart wood in the curve
01:18:39 Scott Hampton: For buckeye burl... www.witthardwoods.com located in Porterville, California.
01:18:58 Philip Scoltock - Hobby Turner: Could look good in woods like Yew; Laburnum or Olive

01:21:00 Tom: bumpies haha! love it

01:22:38 Andrew Henderson: I'm glad I'm not a bump on a log!
01:30:50 Kris Roberts: Cindy, what would you use those little pieces for?
01:34:52 Andrea: Where do I buy the Elio drive?

01:37:56 Rob McDowell: When do you adjust the other two screws on the drive?
01:39:28 Cynthia Gibson: Elio is a fine man! I use a peppermill each

day that he gifted me years ago
01:40:11 Tod Raines: Thanks for dropping the link Cindy and Cynthia.
01:40:21 Cynthia Gibson: Steb Centers: Packard Woodworks, Craft Supplies USA
01:41:18 Andrea: No elio drive on their web store. Just checked. Other source to buy this?
01:41:20 Cynthia Gibson: Absolutely, Todd!

01:45:57 Rob McDowell: Will you need to readjust your two screws after adjusting the tailstock?
01:45:58 Tom: RPM Cindy?
01:46:16 Tod Raines: The 2" Elio Drive has been out of stock for a while. Plenty of 2.5" Elio drives in stock.
01:46:58 Rob McDowell: 👍

01:59:10 Asaf Peled: What is the diameter of this gouge?
01:59:19 Larry: 1/2" or 5/8" gouge for 40/40?
01:59:27 Cynthia Gibson: 1/2 inch
01:59:38 Asaf Peled: Thanks :)
02:00:24 Cynthia Gibson: ;^))
02:02:33 Michael McSchaefer: twice as concentrated or twice as dilute?
02:02:52 Marc Ballard: Looks like the Elio 2.5 or even the 3.5 has plenty of room to add two more threaded holes closer together for smaller blanks ...
02:03:14 Cynthia Gibson: ransTint Dye: Woodcraft.com Homestead Finishing Products

02:04:12 Cindy Navarro: what is moly?

02:05:09 Cindy Navarro: thanks

02:05:17 Rob McDowell: <https://www.wood-database.com/red-mallee/>
02:07:12 Holly Little: Are you using black on the edge of the rim?
02:08:01 Tom: please show the negative rake scraper. it looks like a skew
02:12:18 Tom: thank you
02:17:29 Asaf Peled: How come the wall thickness is not consistent? Sorry for maybe a stupid Q ...
02:18:18 Kris Roberts: Cindy, how did you mess up?
02:18:21 Asaf Peled: But it was turned out and in on the same center...:/
02:18:34 Andrea: How did you 'mess up' the wall thickness? would you reposition the blank to get an even rim thickness?

02:18:53 Philip Scoltock - Hobby Turner: The aim of the gouge was not perfect
02:18:58 Robert Hodge: The edge of rim was thinner than the wall a little deeper
02:19:12 Asaf Peled: Ok, got it
02:19:12 Kris Roberts: Thanks, Cindy
02:20:48 Robert Hodge: Do you try and make the lowest edge of waterfall rim to be at the same level as the finished base of the bowl as the drawing shows or does this vary piece to piece?
02:21:37 Edgar sims: Cindy the live center seems to be a bit out of round. Is this optical or ?
02:25:05 Richard: could you please repost the link for the handouts, I missed it first time around. Thanks

02:26:20 Edgar sims: Ah Ha Thanks
02:26:25 James Walt: if you were making this same piece in your shop all alone how long would you estimate it would take?
02:26:52 Cynthia Gibson: giggles!
02:28:40 James Walt: awesome thank you
02:28:50 Brian Burttram: Any tips on how to recover if you scrape and find out the wood has already moved?
02:28:57 Andrea: Correct me if I'm wrong but in the last step if you used the pointless rim instead of the stoeb center on the TS end would you not have had an uneven rim?
02:30:11 Brian Burttram: Thank you
02:31:26 Chandra: just curious...how many bowl gouges do u have? do u have a favorite tool depending on what you are making?

02:32:32 Chandra: Thank you, Cindy. :)
02:32:41 Andrea: I love your negative rake scraper!
02:34:25 Philip Scoltock - Hobby Turner: Have you tried 15V Cindy ?
02:34:42 Normand Therrien: Who make 10 V
02:36:42 Gordon Gilomen Haywood County, NC: is your elio drive
2 1/2" or 3 1/2"?
02:36:55 JP Niemisto: have you tried robust bowl gouges?
02:37:19 Rob McDowell: Cindy, I've been using an Ellsworth grind for
years. Do you ever use that grind with your gouges?
02:40:01 Rob McDowell: Thank you
02:41:25 Tracy Ekizian: what's the best method to begin your entry
cut into the rim?
02:49:40 Andrea: In general, how much extra rim thickness do you need
for scraping? At what thickness might the dye penetrate to the other
side of the wood?
02:51:58 Bill: Would it be better to spray the dye ? Thanks
02:53:36 Cindy Navarro: Since it is a burl there is end grain
everywhere so it makes sense that some areas would absorb more dye in
different places
02:57:11 Kris Roberts: On that through blotch of dye, is there a way
to bleach/thin that color back out/
02:59:05 Michael McSchaefer: when using the negative rake
scraper...the tool is flat on the rest?
02:59:31 Marc Ballard: Have you ever used a burring tool vs grinding
for neg scaper?
03:00:42 Bill: is the random orbit sander air or electric and what
brand Thanks
03:03:54 richard coter: those claws have a small protuberance, they
are not dovetail. do not need to replicate it to avoid movement during
tightening?
03:04:07 richard coter: *jaws
03:04:58 richard coter: ok, thanks
03:10:36 Philip Scoltock - Hobby Turner: You need some Martel
calipers Cindy !
03:13:46 Philip Scoltock - Hobby Turner: Three sizes small; med &
large
03:14:22 Normand Therrien: André Martel from Quebec, LOL
03:15:26 Richard: what kind of wheel? grit?
03:15:46 Michael McSchaefer: is the 25 deg a secondary bevel, or
is your entire bevel (Easch side) at 25?
03:16:49 Richard: do you ever use a burnisher to turn the burr?
03:17:13 Cynthia Gibson: Cindy will get to those questions when she
returned to the lathe..thanks everyone for your patience
03:18:44 Rob McDowell: What grit are your CBN wheels?
03:18:46 Scott Hampton: I find my M42 gouges hold a sharp edge longer
than regular M2 steel.
03:19:11 Marc Ballard: have you ever used a burring tool instead of
grinding?
03:19:33 Dale Quakenbush: wheel grits?
03:23:43 JP Niemisto: does it matter how long you let the dye dry

before knocking it back?

03:25:24 Paul Lajoie: do you usually use a respirator when your turning

03:25:28 Marc Ballard: Harbor freight has a 2" orbital angled air sander for \$25. Been using it and works well for \$25. <https://www.harborfreight.com/air-angle-sander-93629.html>

03:27:02 Worth Holmes: do you sell that tool?

03:27:55 Cynthia Gibson: yes!

03:28:00 Cynthia Gibson: Website, for tools, videos, and demonstrations: <http://www.cindydrozda.com/>

03:28:07 Roger: Yes, she does. I have one and it works wonderfully.

03:29:02 Michael Kratky: Mostly cherry and maple burls here in the Adirondacks in the back yard.

03:31:36 Joe Diver: could you use a skew to cut ros

03:32:29 Kris Roberts: Why wouldn't you use the recess your just made, and light cuts?

03:32:36 Joe Diver: could you use skew to cut recess

03:33:29 Kris Roberts: No, on the chuck.

03:36:34 Jay Heryet: Could you explain why not to peel on side grain please?

03:38:29 Jay Heryet: Thank you.

03:39:33 Philip Stivers: Would this be a candidate for vacuum chucking?

03:41:00 Chandra Vemulapalli: Could u have used hot glue along with the Jam chuck? some woodturners vouch for the strength of hot glue

03:41:19 Holly Little: What's the diameter of the tenon?

03:41:34 Barry Wright: Could you reverse the lathe and cut over the tailstock with the gouge

03:42:54 Vernon Danielsen: How do you know the wall thickness?

03:45:32 Julie Schmidt: wouldn't the glue mess up the dye?

03:45:47 Rob McDowell: Vacuum chucks are difficult with burls because of small holes preventing good suction.

03:49:22 glenn dornak: what size are the scrapers that you are using?

03:51:40 JP Niemisto: Do you use inertia sanders? if you do what brand do you like?

03:52:02 Scott Hampton: OUCH!! Sounds like a dentist's drill, lol.

03:52:15 Maryalice Birk: What sandpaper do you use for the 1" paper

04:44:05 Edwina Murfet: that is divine Cindy ❤️

04:44:05 Donald Murray: A very renaissance look

04:44:36 Graham Brooks: Thanks Cindy for an interesting and

informative demo again.

04:44:40 Guy Laizure: What would the color sequence be if you used purple an red. Would you still use black as a first color.

04:45:58 David Drickhamer: Why didn't you put black inside the lid?

04:46:07 Donald Murray: could you use mbrown with a natural finish over it?

04:46:56 Guy Laizure: Art Leistman does a great brown tone on maple burl

04:47:00 Marc Ballard: So you are done scaping / sanding at this point correct?

04:47:13 Marc Ballard: yes

04:47:44 Marc Ballard: that's what I was wondering
