

How to update Zoom

It's important to run the latest version of Zoom. They are constantly improving features and security. Please make sure your Zoom client is up to date. This has to be done on each computer or device, not in your account online.

To update your Zoom desktop client program:

Open the program (app) by clicking on the Zoom icon in the Dock or Start Menu so that it displays the screen on the left. You will need to be signed in to Zoom on that device to see this. Click on the icon or photo next to the search area. This displays a menu. Select Check for Updates. Follow the onscreen instructions.

To update Zoom on your phone or other device:

Go to the App Store or Google play, find the "Zoom Cloud Meetings" app, and tap "update".
